WATSON SEEDS

The Eggo family have an unrivalled reputation in serving the farming community in the supply of top quality seeds and seeds mixtures for four generations.

“Good pasture is the best savings bank a farmer can lodge his cash in “ Quotation 1930’s .

We all could have done without the current banking crisis and the impact it has had on the economy at large, but Scottish farming, as with 80 years ago, has opportunities if we stick to our strengths. Good pastures continue to be the backbone of successful livestock production.

Last year, we at Watson Seeds had our busiest year, supplying a record acreage of grass and forage seed to our customers.

We have secured, what we consider to be, the best ingredients for the Saltire range, which continue to contain only SAC first choice varieties of grass and clover, which is independently mixed in Scotland.

This year has seen an easing in the market price of procuring what we require. The price list for our mixtures has been reduced for 2010 to reflect this. It is only right and proper that we pass the benefit on to you, our customer.

Sandy and Alex Eggo and I very much appreciate your support through Alex’s first year as your local seed specialist and look forward to building on this relationship for 2010.
